

Prescription Safety Eyewear Worksheet

Ritz Safety Representative: _____ (please print)

End User: _____ (please print)

End User Administrator: _____ (please print)

End User Phone: _____ (please print)

- 1) How many associates are employed by the end-user?
- 2) Is the end-user currently being billed directly by a lab or a retail office (independent doctor or optical shop, LensCrafters, WalMart, etc or if currently working directly with another lab)?
- 3) What are the company allowances and does the company allow Payroll Deduction for overages?
- 4) What is the eligibility for allowing employee to get new glasses? (annually is average)
- 5) Any options or items the company will not allow? (glass material lenses, dark tints, etc)
- 6) Are there any special items the company will pay for in addition to lenses and frames? (extra coatings, tints, transitions, etc)
- 7) If you are interested in an on-site program, what are the times for your shift changes (usually 500+)?
- 8) Permanent OR Detachable Side-Shields?

On-Site Advantages: Larger frame selection, same LICENSED optician, repairs, maintenance and control.

Off-Site Provider Advantages: More cost effective for smaller end-users, can go when the associate wants, and multiple provider locations available.

Both On-Site and Off-Site provider programs may be combined if needed.
