# FirmFit™ Single-Use Earplugs

**Honeywell**  
HOWARD  
LEIGHT

ITEM #	UOM	COLOR
HDLFF1	PAIR	ORANGE

## Product Description

Extensive research into earplug preferences revealed that some workers prefer a firm foam earplug. They gain a sense of security from feeling the earplug in their ear. And while they like knowing the earplug is there, workers want greater comfort. Independent tests reveal that FirmFit™ outperforms the leading classic-style earplug, providing workers with a more comfortable option.

## Features

- Effective NRR 30dB provides excellent protection in most medium-to-high noise environments.
- Requires less pressure to roll down. Slow recovery rate gives you plenty of time to correctly insert in ear canal.
- Distinct warning orange color makes compliance checks easy.
- You can feel that FirmFit™ is softer when you hold it.
- FirmFit™ exerts less expansion pressure on the ear canal.

## Application's / Industry

- Agriculture
- Fire Protection
- Utilities
- Transportation
- Steel and Metals
- Manufacturing
- Mining
- Construction

## Specifications

Manufacturer P/N	FF-1
Certification	Tested to ANSI S3.19-1974
Material	PVC Foam
Style	Uncorded
Size	One Size Fits All
UOM	Pair
NRR Rating	30

User shall be exclusively responsible to assess the suitability of the product as specified for any individual application or use. Product features, design and protection zones and/or capabilities are subject to change. These hearing protectors help reduce exposure to hazardous noise and other loud sounds. Misuse or failure to wear hearing protectors at all times that you are exposed to noise may result in hearing loss or injury. For proper use, see supervisor, User Instructions, or call Ritz Safety at 1-800-451-3077. If there is any drainage from your ear or you have an ear infection, consult with your physician before wearing earplugs. Failure to do so may result in hearing loss or injury. NRR Footnote: Research suggests that many users will receive less noise reduction than indicated by the NRR due to variation in earplug fit and wearing time. It is recommended that the NRR be reduced by 50% for estimating the average amount of noise reduction provided
