## TWO HOLE ANCHOR

The Ritz Fall Protection Two Hole Anchor is a critical component to your fall protection system when fall risk is a concern in your work environment. This anchorage connector is constructed of high strength alloy steel and can be bolted (via the two 1/2" diameter holes; bolts sold separately). This anchor is ideally suited for construction, general industrial and mining.

### FEATURES

- Anchor plate with D- ring (DR 008) can be easily installed on the structure with help of M16 chemical anchor bolts as well as mechanical fasteners.
- Easy to install, light in weight & is reusable.
- The D-Ring can be safely used as an Anchor point.

### TECH SPECS

|                                  |  |
|----------------------------------|--|
| <b>Material</b>                  | Alloy Steel  |
| <b>Minimum Breaking Strength</b> | 5000 lbs (23KN)                                      |
| <b>Weight</b>                    | 0.386 kgs $\pm$ 0.020 kgs (0.85 lbs $\pm$ 0.044 lbs) |
| <b>Finish</b>                    | Shot blasted and yellow passivation                  |
