OKTOFIT 1 D-RING HARNESS

Introducing the OKTOFIT 1 D-RING Harness – your ultimate safety companion for any high-risk work environment. Engineered with precision and designed for maximum protection, this harness is packed with innovative features to ensure your safety on the job. Featuring vibrant orange webbing for heightened visibility and a slip-resistant back D-ring with a flexible D-ring pad, the OKTOFIT 1 harness sets a new standard in safety gear. With its effortless vertical adjustability that remains securely in place and convenient 5-point adjustments, you'll experience unparalleled comfort and control. Additionally, the inclusion of lanyard parking loops adds to the practicality of this harness, making it the ideal choice for those who prioritize safety without compromising on functionality.

FEATURES

- Harness is made from high-quality materials and features one D-ring
- The webbing strength makes it strong enough to handle rugged environments
- Features multiple buckles that allow you to adjust the fit to your body
- The chest buckle and leg buckle are made from steel and have a strength of 18kN
- Features reflective material that increases your visibility in low-light conditions
- The harness is easy to put on and take off, and it can be used in a variety of industries and applications
