

RTZ8184L

4' CONCRETE CHOKER STRAP

The Ritz Fall Protection 4' Concrete Choker Strap features a polyester webbing with both side textile loops and 52 mm tubular webbing. It is made of high-tenacity polyester stitching thread and provides a lightweight and reliable solution for anchorage during work at height activities.

FEATURES

- The choker strap loop ends are made of synthetic fiber and fit snugly around the material, providing a secure grip and preventing slippage during lifting operations
- The strap distributes the load evenly, minimizing stress points and preventing damage to the lifted material
- Ideal for construction projects that require heavy lifting.

TECH SPECS

Webbing Material	Polyester
Webbing Width	44±1mm
Webbing Breaking Strength	5000 lbs
Stitching Thread Material	High-tenacity polyester
Static Strength	5000 lbs for 1 Minutes
Weight	210 gm ± 10gm
