REUSABLE FLAT ROOF ANCHOR

The Ritz Fall Protection Reusable Flat Roof Anchor is a high-strength anchor designed for safe anchorage of workers who need to work at height on flat roofs. It is a popular choice for businesses that require a safe and flexible fall protection system.

FEATURES

- High-strength steel anchor
- Flat design ensures minimal interference with other equipment or work in the area
- Reusable for cost-effective solutions for multiple jobs
- Weight capacity of up to 5000 lbs
- Compliant with OSHA and ANSI standards for fall protection
- Easy installation using standard tools
- Compatible with various lanyards and lifelines for greater flexibility in fall protection systems
- Sloped or flat wood or steel roofs

For Flat Surface mm (inch)
