6FT DROP THROUGH ANCHOR WITH SWIVEL

Ritz Fall Protection introduces the 4ft Drop Through Anchor with Swivel, an innovative safety solution that offers strong and reliable fall arrest protection. This durable anchor is designed be fixed on concrete steel deck or steel grating structure to create a permanent anchor. It can be installed either at time of pouring of concrete or by making a drill on concrete. The swivel eye can be used as anchorage point. Perfect for ensuring safety during construction and maintenance work in concrete and steel structures.

FEATURES

- Swivel ring, used as anchor point
- Heavy-duty 5,000-lbs loading
- Reusable & reliable design
- Ideal for concrete and steel
